*Imperva recommends learning to use the products for at least 6 months. Use online resources to assist.
Courses

Administering Imperva Security Infrastructure

Pre-Requisites: None
Training Units Needed: 2
Training Units Good 1 Year from Date of Purchase

In this 2-day on-demand training course, students will learn:
• How to install and maintain SecureSphere system components including the Management Server, Gateway, and Agents
• How to ensure connectivity among SecureSphere components and commonly integrated network devices
• How to perform initial SecureSphere administration and configuration tasks that align with an organization's architecture and specific requirements or follow Imperva best practices
• Common cross functional tasks such as object creation, policy creation, basic rule understanding, system alert interpretation, and report generation
• Advanced techniques to externalize the information collected by all major SecureSphere product lines

Database Security & Compliance

Pre-Requisites: None
Training Units Needed: 4
Training Units Good 1 Year from Date of Purchase

In this 4-day hands-on training course, students will learn:
• How to initially configure SecureSphere for a Database Security deployment
• How to run DB Data Classification Scans to find sensitive data
• How to implement Database Security Policies and Database Auditing.
• How to configure DB Profiling
• How to analyze Database Violations and Alerts
• How to configure best practice tuning tasks
• How to configure Active Blocking
• How to configure Assessment Scans and manage risk scores
• How to configure Database User Rights Management Scan and analyze the results

Attack Analytics Overview

Pre-Requisites: None
Training Units Needed: None
Training Units Good 1 Year from Date of Purchase

In this 2-day on-demand training course, students will learn:
• Benefits of Attack Analytics

Web Application Security

Pre-Requisites: None
Training Units Needed: 4
Training Units Good 1 Year

In this 4-day hands-on training course, students will learn to:
• Configure SecureSphere for an on premises Web Application Firewall including ThreatRadar subscription services
• Evaluate the configuration of the Web Application Firewall to verify assets are protected
• Implement security controls using Policies and Followed Actions
• Configure Web Profiling and Active Blocking
• Analyze Violations and Alerts.
• Perform best practice tuning tasks
• Integrate external web scanner data with SecureSphere and manage identified vulnerabilities.
• Configure SecureSphere Web Gateway to work in a Reverse Proxy deployment mode
• Full-day Capstone lab for concept reinforcement and certification prep

What's New in Release ??

Pre-Requisites: None
Training Units Needed: None
Training Units Good 1 Year from Date of Purchase

In this micro on-demand course, students will learn:
• Features and Benefits in our newest release

To register and take On-demand courses, log into your Imperva portal account and go to the Training tab.

Courses

Camouflage Fundamentals 4.5.5
Pre-Requisites: None
Training Units Needed: 1
Training Units Good 1 Year from Date of Purchase
In this 1-day on-demand training course, students will learn:
• Data masking theory and best practices
• How CX-Discover and CX-Mask discovers and protects sensitive data in an organization
• How to configure CX-Discover and execute search rules against targeted databases
• How the Functional Masking Document (FMD) is created
• About the main concepts used in data masking and built-out in the FMD
• How to execute CX-Mask with a completed FMD
• How to mask data safely using masking strategies and transformer tools

Cloud WAF Web Security Administration
Pre-Requisites: None
Training Units Needed: 1
Training Units Good 1 Year from Date of Purchase
In this on-demand training course, students will learn:
• The benefits of the optimization, security and redundancy features of Incapsula DDoS protection, Web Site Security, Content Delivery Network and Load Balancer products and solutions
• Traffic routing, inspection and filtering capabilities between clients and web applications via the Incapsula network
• Onboarding of an Incapsula Web Application Firewall to protect an organizations web site
• Basic security concepts and setting up web application security protections and customized rules
• Tracking of bandwidth usage and how to recognize the DoS and DDoS impacts
• Configuration of load balancing within and between data centers
• Benefits and performance improvements available with various caching options in an Incapsula CDN

Data Security Analytics (Counterbreach)
Pre-Requisites: None
Training Units Needed: 1
Training Units Good 1 Year from Date of Purchase
In this 1-day hands-on training course, students will learn:
• How to install the CounterBreach Admin and Analytics Servers
• How to integrate Active Directory into CounterBreach Analytics
• How to integrate CounterBreach with several types of audit sources
• How data flows through a CounterBreach architecture
• Confirm appropriate audit detail is received in CounterBreach
• Analyze Incidents to identify careless, compromised, or malicious activity
• Analyze Incidents to identify false positive events
• Benefits and performance improvements available with various caching options in an Incapsula CDN
