

Imperva Professional Certification Program

V1.0 07-14-21

Expertise in Security and Compliance

In the ongoing effort to keep critical data and applications secure and ensure data centers maintain compliance in the face of ever-changing global requirements, companies choose Imperva solutions. Imperva Security Professionals are in-demand experts in architecting, deploying and administering our industry-recognized “Best-in-Class” Imperva products.

This certification program update combines the former Associates and Specialist exams into one for each track to expedite and streamline the certification process, but without compromising on reliable knowledge validation for the user. Additionally, a new certification for cloud users will soon be released.

Imperva Professional Certification Requirement

The Imperva Professional Certifications are awarded to Imperva partners and customers. The three certifications are:

- Imperva Data Security Certification
- Imperva Application Security Certification
- Imperva Cloud Security Certifications

Expiration: Cloud Certifications expire 1 year from the date of issue.
Time to complete: 30 minutes

Imperva On-Premise Security Certifications

The Security certifications are designed to validate both knowledge and practical skill in deploying, hardening and administering Imperva On-Premise Gateway platforms of the Imperva products. The following are required pre-requisites to the security certification exams:

- Attendance of pre-requisite courses, as shown in the table above.
- Please request a quote to order these classes and certification exams through your sales representative. An Imperva Service Order Number (SRV#) is required to enroll.

Six months practical experience in implementation, administration and support is recommended, and successful completion of the corresponding pre-requisites.

*Additional training is available with our Annual On-Demand subscription library. See our Training Catalog for more details.

Imperva Cloud Security Certifications

Imperva recognizes the need to prepare users to get the most out of our cloud solutions. Along with a new set of courses to round out our curriculum, we will be rolling out Cloud certification exams in 2021. This certification will include core course material as well as specializations that target products you use.

Certification Exam Experience & Requirements

Imperva certification candidates are expected to demonstrate the highest ethical standards. Candidates are trusted to take the exams themselves using their own acquired knowledge and skills. No exam questions or documents are permitted to be screen-captured, copied, or shared.

The Security certification exams are timed, multiple-choice and taken on-line through Imperva University. It covers theory, concepts and information on how the Imperva product is architected, deployed, and administered. The exam covers information learned in the prerequisite courses.

Passing: A score of 80% or higher

Exam Attempts Permitted: One (An extra exam attempt is available with voucher SKU. See your sales representative for more information.)

Feedback: As a certification exam, no feedback other than the score at the end of the exam is given. Exam responses cannot be downloaded. Exam scores and certificates are available in your training transcripts on Imperva University.

For additional information on certifications, certification payment and certification attempts, please refer to Imperva Terms and Conditions when registering for your certification exams.

Security Specialist Exams Expired

With the effort to streamline our certification process, the Security Specialist exams are expired as of February 8, 2021. Some exceptions do apply for those that have purchased but not taken this exam. See the announcement for the certification update in your course materials. The hands-on job-based scenarios are evaluated using written exam items to test experience and knowledge of the platforms.

Additional Training Resources

Aside from instructor-led training, we offer an elearning library which is designed to supplement learning whenever you seek additional knowledge or to enhance your skills. This library is incorporated into other training bundles to offer a hybrid-learning approach, so getting that certification is easier and adjusts to your time.

Please see our training catalog from our website for more information.
