DDoS Mitigation Best Practices

imperva
DDoS
Protection

Be proactive

Do your investigations now and get protected with a DDoS solution

If under attack choose a provider with quick and easy onboarding

Keep the dialogue open between the security and networking teams

Choose a reputable DDoS provider

Choose a low-latency solution

Choose a solution with fast and accurate mitigation

Be sure your provider offers on-demand and always-on options

When targeted by a ransom threat:

Contact the Authorities

Keep a record of the Ransom note

Paying the ransom does not guarantee you will not be attacked again
